

Assigned in constructor

```
this.request = require('request')
```

```
this.cheerio = require('cheerio')
```

```
this.config = require('../config')
```

```
this.db = {}
```

```
this.cradleConnection = //CouchDB
```

API

```
resetCache = function(dbName, cacheID, data)
```

```
checkCache = function(res, dbName, cacheID, cacheMiss)
```

```
cacheRequest = function(req)
```

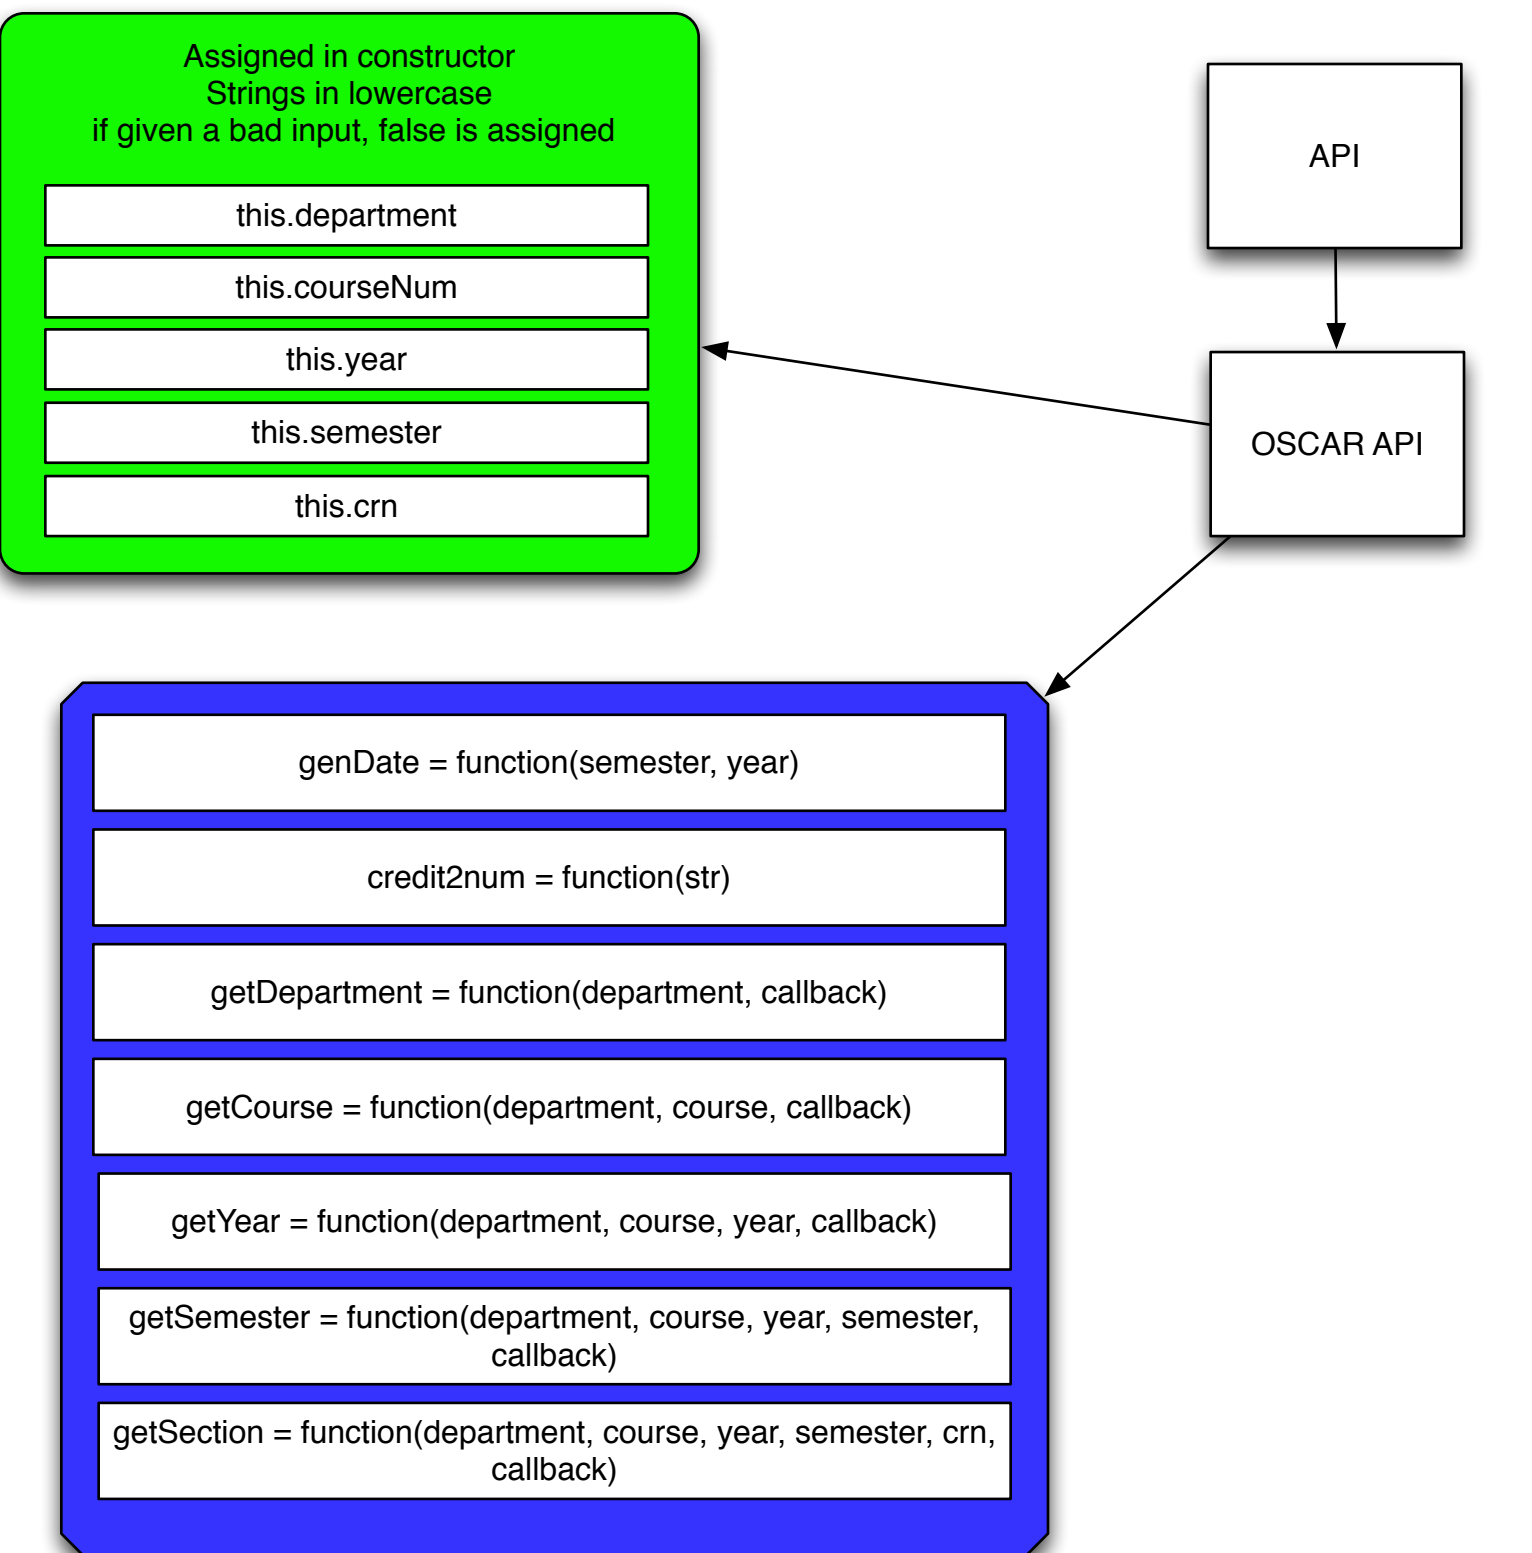

```
dbConnection = function(dbName)
```

```
getCache = function(dbName, items, callback)
```

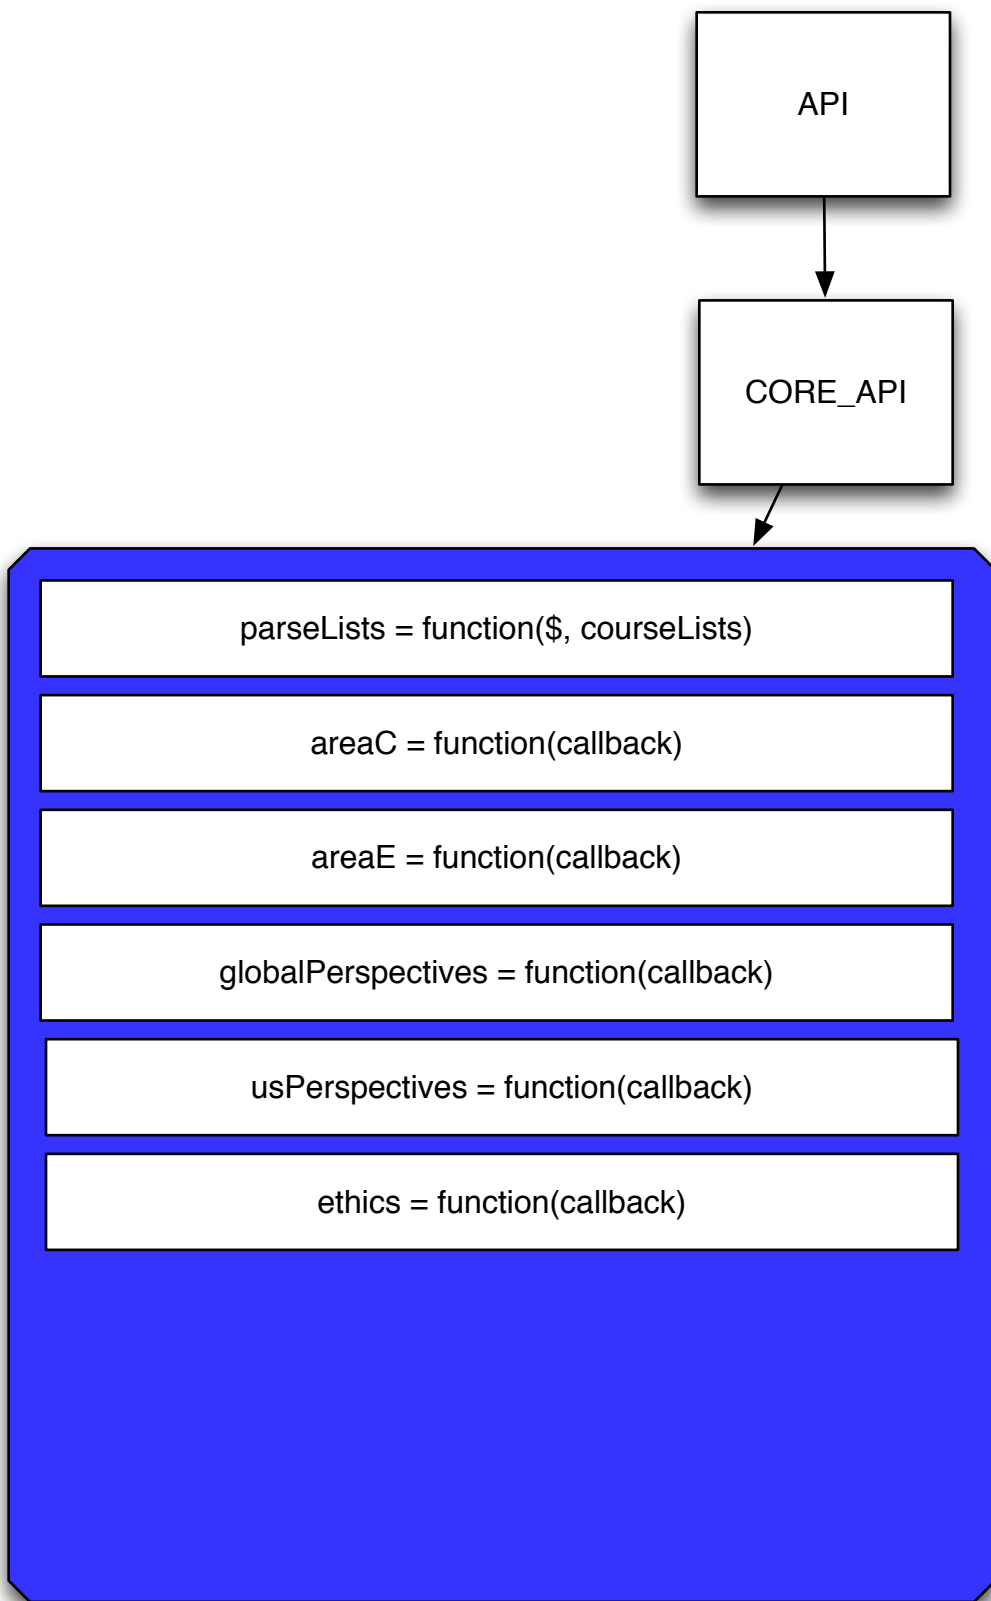

```
setCache = function(dbName, item, data, callback)
```

```
getURL = function(url, callback)
```

callback is an optional param in all functions **except for getURL**

callback is an optional param in all functions

callback is an optional param in all functions
